DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 23, 26, 29, drawn to Data Processing: Presentation
Processing of Document-Structured Document, classified in class 715,
subclass 513.
 - II. Claims 7-13,24,27,30, drawn to Data Processing: Presentation Processing
of Document-Layout, classified in class 715, subclass 517.
 - III. Claims 14-22, 25, 28, 31, drawn to Data Processing: Presentation
Processing of Document-Hypermedia, classified in class 715, subclass

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility directed to providing information about an object through a graphical interface, creating and binding pointers in documents with the database without requiring the presentation and graphical representations and formats the layout using style sheets and mapping an area on a display of invention II. See MPEP subsection 806.05(d).

Invention I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility

directed to providing information about an object through a graphical interface, creating and binding pointers in documents with the database binding without requiring the retrieving and hyperlinking of documents of invention III. See MPEP subsection 806.05(d).

Invention II and III are related as subcombination disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility directed to information about an object which presents a graphical representations and formats the layout using style sheets and mapping an area on a display without requiring the retrieving and hyperlinking of documents of invention III. See MPEP subsection 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
